DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to an SPM system for making a modification to an object, classified in class 250, subclass 234.
- II. Claims 5-30, drawn to a scanning probe microscopy system for working with an object having a work surface, classified in class 250, subclass 306.
- III. Claims 31-32 and 34, drawn to a vacuum arc tool for modifying an object, classified in class 216, subclass 2.
- IV. Claim 33, drawn to a material removal system for removing loose material from an object, classified in class 365, subclass 151.

Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the vacuum arc tool of the group III invention is not limited or specifically necessary for the scanning probe microscope of the group II invention. The subcombination has separate utility such as other devices that have need of a vacuum tool.

Art Unit: 2878

Inventions I, II and IV are related as separate and distinct inventions. These inventions, though related in technology, are distinct from each other if they are shown to be separately usable. In the instant case, Inventions I and II have separate utility such as usage as different types of scanning probe microscopes. Invention IV has separate utility for removing loose material from an object, a feature not necessary for either of the microscopes of Inventions I or II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
